

Madhu Kahar

EXPERIENCE

September 2022 - Current

Software Developer Bajaj Broking | Mumbai

- Participating in an agile and collaborative team environment for solution design.
- Wrote and developed new and well-tested code for different software projects.
- Scripting and developing the business validation using front-end as per the system requirement, optimizing and customizing the existing products as per the requirement.
- Designing, developing, modifying and maintaining new and existing software applications, integrations, and services of medium complexity under supervision.
- Worked closely with other team members to understand, identify, and remove software bugs without impacting the working codes.
- Developed new, efficient and well-tested code for variety of different software projects as per the given requirement on given time.
- Conferred with project managers to gather information and clarity regarding limitations or capabilities.
- Amended existing software to upgrade interfaces and elevate performance.
- Troubleshoot and debugged software to check and rectify discrepancies.

September 2021 - September 2022

Fellowship Intern BridgeLabz solution | Mumbai

- Involved in the fellowship programme covering Software Development practices.
- Involved in understanding and implementation of experiential learning.
- Implementation of pair programming.
- Worked with the team, solving and developing efficient, user-friendly products.
- Designed user-friendly interfaces, significantly improving the usability and accessibility of software applications.
- Worked closely with project managers to define project scopes and timelines, ensuring successful project execution.
- Enhanced working relationships by participating in team-building activities.

EDUCATION

2021

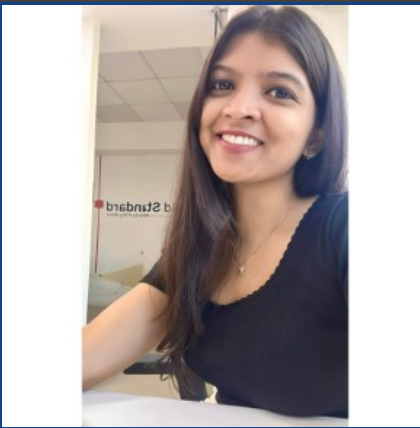

Master of Science | IT

SIES College of Management Studies, Nerul, Navi Mumbai

2018

Bachelor of Science | IT

MGM College of Engineering & Technology, Navi Mumbai

SUMMARY

With 3.5 years of experience in frontend development using React.js, Next.js and partial exposure to Node.js. I possess a strong skill set in client interaction, requirement gathering, analysis and documenting functional and technical specifications. As a detail-oriented team player with excellent organizational abilities, I am adept at managing multiple projects simultaneously with a high degree of accuracy.

SKILLS

- **Languages:** JavaScript, TypeScript, HTML5, CSS, and Node.js
- **Libraries/Frameworks:** React.js, Redux, Next.js, React Router, jQuery
- **Styling Tools:** Ant Design, Material UI, Sass, Bootstrap
- **Development Tools & Practices:** Package Management, Performance Optimisation, Code Quality, API Integrations, State Management, Component Development, Event Handling, UI Design

PROJECTS

Trading Portal (JavaScript, ReactJS, HTML5, CSS, Bootstrap)

- R&D on new technologies, tools, and integration with applications.
- Worked closely with team to achieve the sprint targets.
- Implemented responsive UI screens and integrate the API's.
- Created component and used it on multiple places and handled functionalities accordingly.
- Fixed the bugs reported from testing team.
- Mentoring other developers about the code.
- Gave the demo of completed work with all stakeholders at the end of sprint.

COSMOS(JavaScript, ReactJS, HTML5, CSS, Bootstrap, SASS)

- Implement API, charts, and other graphs with functionalities.
- Discussed about the requirements with Backend developers and other project managers.
- Proficient in leading and monitoring development teams to deliver innovative and scalable solutions that meet business requirements.
- Skilled in implementing software development methodologies and processes, as well as communicating technical concepts to both technical and non-technical stakeholders.
- Adept at collaborating with cross-functional teams and managing project timelines, quality assurance. Strong expertise in React, JavaScript, HTML, and CSS, with a passion for delivering exceptional user experiences.

PARTNER PORTAL(JavaScript, ReactJS, HTML5, CSS, Bootstrap, SASS)

- Designed, developed, and deployed a partner portal application to streamline partner onboarding, Partner Details, Admin Details, Backoffice, collaboration, and reporting.
- Implemented core features such as [list key features, e.g., user authentication, role-based access control, dashboards, and other functionalities].
- Utilized time to develop for seamless functionality and performance optimization.
- Ensured a responsive and user-friendly UI/UX and reducing onboarding time.
- Managed the project end-to-end, including requirements gathering, coding, testing, and deployment.
- Delivered the project within the timeline and ensured high standards of quality and maintainability.

FRANCHISEE PORTAL(JavaScript, Next JS, HTML5, CSS, Bootstrap, SASS)

- Designed, developed, and deployed a Franchisee portal application to streamline franchisee onboarding, and other Backoffice details.
- Managed the project end-to-end, including requirements gathering, coding, testing, and deployment.
- Ensured a responsive and user-friendly UI/UX and reducing onboarding time.
- Delivered the project within the timeline and ensured high standards

- of quality and maintainability.
- Resolved the observation points after testing.

MUTUAL FUNDS(JavaScript, ReactJS, HTML5, CSS, Ant Design, SASS)

Currently, I am working on in-house product to maintain large scale frontends by using ReactJS, JavaScript, CSS, HTML5, SASS, Ant Design.

- Proficient in leading and monitoring development teams to deliver innovative and scalable solutions that meet business requirements.
- Discussing with Backend team and other stakeholders to understand the requirements in a better way.
- Integrating API's, and handling other functionalities for managing graphs, charts etc.
- Reusing codes on required places by making it common, which helps to reduce the coding lines as well as easy to use.
